

## **FEDERCULTURE AWARD**

The merit of the project **Babygella – Insieme alla scoperta dell’Arte** (Babygella – Together discovering art”) is in the realization of a permanent educational journey which makes one of the ten most important Italian museums captivating and interesting for children.

It is the first in a series of similar events that the promoter and the interested superintendents intend to carry in various Italian cities. The main innovation is in the utilization of a true didactical infrastructure that, through Chiara Rapaccini’s drawings and language that relates to children, allowed the creation of a story in episodes with captions for words and images.
